

Jarvis Your Personal Assistant

Ever wanted a personal assistant that could tell you the weather and allow you to make a schedule of upcoming events? Well say hello to Jarvis.

Jarvis can recognize if you are asking him to create a schedule or recognize if you are asking about the weather..

Once recognizing one of these two actions Jarvis will ask follow up questions like: Date and time of the event? What is the event for?, and ask for a zip code of a place to know what the weather is like there.

Jarvis can also answer specialized questions about the weather, like: what the temperature is, wind speed, and etc.
